

Did you know that 50% of household waste is composed of food waste? Food waste is a major contributor of greenhouse gas (GHG) emissions!

ON-SITE FOOD WASTE DIVERSION

pilot program

Join your municipality in tackling food waste by piloting FoodCycler™ technology in your home.

WHAT IS A FOODCYCLER?

Closed-loop indoor compost alternative, which speeds up the natural decomposition process.

It dries and grinds food waste into a dry, odourless, nutrient-dense by-product in 4-8 hours.

Use the byproducts as a fertilizer and add it to your garden, lawn or existing composting system.

Odourless, easy to use and energy efficient alternative
